## Recommendation letter

Our company cooperated with Asia Water Service LLP during October-November 2018.

Asia Water Service LLP has been working with the project "Constuction Artemevsky mine -2" consulting services to evaluate the technical viability of proposals received from various water treatment companies for a water treatment installation at the Artemevsky mine.

During the period that we worked together, Asia Water Service I.L.P exhibited good skills, judgement, and assisted KAZ Minerals "Constuction Artemevsky mine-2" project team to make the correct technical decision for taking this project forward. It was clear to us that they are skilled in the aspects of water treatment and various technologies available for that.

The literacy in technical questions, aspiring to the innovations along with performance and clearness in their work, allow us to recommend AWS as a skilled and reliable partner.

Best regards,

Head of  
Central Projects Department
